<tr>
<td>EMAIL: <a href="mailto:Rajeev.Azad@unt.edu">Rajeev.Azad@unt.edu</a> For emergencies, not in lieu of attendance. Allow two (2) business days for reply. Email must be sent from UNT domain. Include course name, number and section and your full name in the subject header.</td>
<td>FINAL EXAM DATE AND TIME: See online for official UNT Fall 2015 Final exam schedule. Date will be repeatedly announced during lecture. registrar.unt.edu/exams/final-exam-schedule/fall</td>
</tr>
<tr>
<td></td>
<td>Evening Classes: have their final exams on the earliest usual class time this week.</td>
</tr>
<tr>
<td></td>
<td>Final exam date: Dec 8, 2015 (Tuesday) at 6:30 PM at GAB 105</td>
</tr>
<tr>
<td></td>
<td>UNT MATH TUTOR LAB (GAB 440): Go to Website: <a href="http://www.math.unt.edu/mathlab">www.math.unt.edu/mathlab</a> for information. Opens Aug.31</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>COURSE DESCRIPTION: Math 1680 (MATH1342) Introductory course to serve students of any field who want to apply statistical inference. Descriptive statistics, elementary probability, estimation, hypothesis testing and small samples. Satisfies the Mathematics requirement of the University Core Curriculum.</td>
<td></td>
</tr>
<tr>
<td>BLACKBOARD LEARN (<a href="http://learn.unt.edu">http://learn.unt.edu</a>): Course handouts, such as Syllabus, CalendarClass Notes Templates, etc. will be posted in Blackboard.</td>
<td></td>
</tr>
<tr>
<td>MyLabsPlus (<a href="http://unt.mylabsplus.com">http://unt.mylabsplus.com</a> ): You will access your math course platform at: <a href="http://unt.mylabsplus.com">http://unt.mylabsplus.com</a>. The course content (assignments, help tools, textbook, etc.) will be delivered in MyLabsPlus. You must register in MyLabsPlus (MLP) by the end of the 1st day of semester. You must purchase MLP by the end of the temporary 14-day access period. Students who do not purchase MLP by the end of the temporary access may lose credit for all work previously completed in MLP AND be administratively dropped with the possibility of no refund. Students will NOT be given extensions for any missed assignments for any reason. Not having access to MLP is not an exception. To enroll in MLP: 1) Go to: <a href="http://unt.mylabsplus.com">http://unt.mylabsplus.com</a>; 2) User Name: your UNT email address; 3) Password: math1680. Change your password immediately after you enroll.</td>
<td></td>
</tr>
<tr>
<td>PRINT TEXTBOOK is OPTIONAL: Statistics Informed Decisions Using Data, 4th Edition with Integrated Review, Michael Sullivan, III. The textbook in electronic form is included in MLP. MLP may be purchased packaged with textbook, as a stand-alone or directly online at the time of registration. Prefer MLP packaged with Integrated Review Worksheets.</td>
<td></td>
</tr>
<tr>
<td>CAMPUS INTERNET ACCESS: UNT has many general access computer labs for students, see <a href="http://www.gacl.unt.edu/">http://www.gacl.unt.edu/</a>.</td>
<td>ONLINE TUTORING: The UNT Learning Center offers an online tutoring system using the AskOnline platform. Go to <a href="http://www.unt.edu/lc">www.unt.edu/lc</a>, and select the online tutoring button located along the top of the page. See BB for more information.</td>
</tr>
<tr>
<td>GRAPHING CALCULATOR: TI 83, TI 83 Plus, TI 84, TI 84 Plus or equivalent for the lecture. Only TI83/84, TI83/84 Plus are supported. TI NSpires, TI 89’s, TI 92’2 or any other utility with alphanumeric/CAS capabilities ARE NOT permitted. A calculator may not be shared during an exam.</td>
<td></td>
</tr>
</tbody>
</table>

Page 1 of 7
ATTENDANCE POLICY:
Class attendance is mandatory. Students are responsible for all information given in class, regardless of his/her attendance. Starting Monday, Oct.5, students may be administratively dropped from the course for nonattendance with a grade of WF. The last day a student may be dropped for nonattendance is Friday, Nov. 20. Five or more absences constitute nonattendance.

ACADEMIC DISHONESTY:
Refer to the following university site for the official policy with regards to academic dishonesty. The web site is: http://vpaa.unt.edu/academic-integrity.htm

GRADE ASSIGNMENT:
A: [90%, 100); B: [80%, 90); C: [70%, 80); D: [60%, 70); F: [0%, 60%), 59% is an F.

A grade of C or better is required for this course to serve as prerequisite for any math course.

Student grade is determined solely by his/her performance on the evaluation criteria. Grades are not wages; they are not intended to reflect how hard you’ve worked or the goodness of your intentions. Grades reflect your proficiency of the course content as you have demonstrated them on the evaluation criteria. Expect no extra credit or bonus assignments.

FINAL GRADE:
Students may access their course grades online at: my.unt.edu. Grades posted in MyStatLab are for your record-keeping purposes only. Your final course grade is determined by the criteria explicitly stated on this syllabus.

DISABILITY ACCOMMODATIONS:
The University of North Texas makes reasonable academic accommodation for students with disabilities. Students seeking accommodation must first register with the Office of Disability Accommodation (ODA) to verify their eligibility. If a disability is verified, the ODA will provide you with an accommodation letter to be delivered to faculty to begin a private discussion regarding your specific needs in a course. You may request accommodations at any time, however, ODA notices of accommodation should be provided as early as possible in the semester to avoid any delay in implementation. Note that students must obtain a new letter of accommodation for every semester and must meet with each faculty member prior to implementation in each class. For additional information see the Office of Disability Accommodation website at http://www.unt.edu/oda. You may also contact them by phone at 940.565.4323.

NOTES:
1) This syllabus is subject to change as the instructor deems necessary. Any/all changes will be announced during regular class time. It is the responsibility of the student to attend each scheduled class to be informed of these changes.
2) You are responsible for meeting all university deadlines, such as: registration, fee payment, drop deadlines, etc. Refer to online UNT Schedule of Classes and/or University Catalog for policies and dates.

Following are schedule dates of which you need to be aware. Please review these dates and note:

<table>

</table>
Thanksgiving Break (no classes, university closed). Nov 26-29

Last Class Day. 3-Dec

Reading Day (no classes). 4-Dec

Final Exams. Dec 5 - 11

End of term. 11-Dec

Academic Dishonesty:
Cheating on final exams, on in-class tests, or on quizzes is a serious breach of academic standards and will be punished severely and generally result in a student failing the course. All work done on in-class exams and quizzes must represent only the student’s own work, unless otherwise stated in the directions. See http://vpaa.unt.edu/academic-integrity.htm for details on academic integrity at UNT.

Attendance:
Class attendance is mandatory. Missing any portion of class (lecture or lab) is considered absence from the entire class. My email may NOT be used in lieu of attendance. Students are responsible for all information given in class, regardless of his/her attendance. This includes knowing exam dates and homework assignments. If you miss a class, it is your responsibility to learn of all the important stuff you missed. Exchange contact information with several members of your class; so that you will have multiple sources contact in case of a personal emergency. Five or more absences in lecture constitute non-attendance; for which a student may be administratively dropped for non-attendance with a grade of WF.

Attendance is also a required component of the recitation portion of this course. To receive credit for attendance you must arrive to the recitation by the start time and work the entirety of the recitation time in your math platform. Missing any portion of the recitation may be considered as absence for the entire recitation. Two or more absences in recitation constitute non-attendance; in which a student may be administratively dropped for non-attendance.

Classroom Etiquette:
Appropriate behavior is expected of all students taking this course. Arrive to class promptly and do not leave until the scheduled ending time of the class. If you must arrive late or leave early, please do so as discreetly as possible and take a seat near an exit. Turn off all non-medical electronic devices such as pagers, cell phones, laptops, etc. Take off the headphones. Do not read newspaper or work on unrelated assignments during class. I prefer that you not eat during class. You will be asked to leave the classroom if you access an electronic messaging device during class AND it will be counted as an absence.

Course Requirements:
As a general rule, average college students are expected to spend a minimum of two (2) hours per week for each one (1) hour of class working on the course to be able to successfully learn the content. If you are an “average” college-level learner, you should spend at least eight (8) hours per week if you expect to successfully complete this course. Adjust for more (or less) hours to accommodate your learning level.

Drop Policy:
If the student is unable to complete this course, it is his/her responsibility to formally withdraw from the course. The student may do so through the Registrar’s Office after obtaining the necessary signatures. Consents for withdrawal and all necessary signatures may be obtained in the Math Department Office, GAB 443. The last day to drop a class with an automatic “W” is Friday, Oct. 2. The last day to drop a class with “W” or “WF” is Friday, Nov. 20. “WF” is averaged into your GPA as an “F.” If the student does not properly withdraw from the course but stops attending, s/he will receive a performance grade, usually an F.

Exams: Three in-class exams are planned for this semester. Count your points on exams to be sure the totals are correct. Keep a record of all your scores. If you think that your work has been graded incorrectly, ask for a re-grade immediately after receiving the exam back. Your entire exam will then be re-graded, and you may lose points or gain points on any problem, including but not limited to the problem you ask about. Check your written exam grade with the grade posted in MLP to ensure that they are the same. Average of the three exams is 42% of course grade.

Content and dates are tentatively scheduled as follows:

EXAM 1: (Chapters 1 – 3)
EXAM 2: (Chapters 4 – 6)
EXAM 3: (Chapters 7 – 9)

The final exam is comprehensive and REQUIRED and it counts 17% of course grade.
Exam Etiquette:

- Place all papers, textbook, notes, etc. in a backpack or a book bag and close it securely.
- Turn off all electronic devices (unless medically necessary), this includes cell phones, pagers, etc.
- Handling of ANY such electronic devices during an exam will be construed as cheating (receiving unauthorized aid) and may result in a zero for that exam.
- Do not wear HATS or CAPS during exams.
- Do not share any materials during an exam. This includes, but is not limited to pencils, erasers, calculators, etc.
- Only approved calculators during an exam. You may have both a scientific and a graphing calculator. It is your responsibility to know how to work the calculator(s) you bring to a test.
- Have only the exam, pencil, eraser and calculator out during an exam. Plenty of work–space is provided on the actual exam. You will not be permitted to have any scratch paper during an exam.

Final Exam:
Your final exam will be administered in our regular classroom. The date and time are posted online at: registrar.unt.edu/exams/final-exam-schedule/fall for UNT 2015 Fall final exams schedule. Look up the time and record it for your academic planning. The final exam is comprehensive and is 17% of the course grade.

Grade Assignment:
The student course grade is assigned according to the evaluation criteria and grading assignment stated on this syllabus. The grade is completely objective and is determined solely by student performance on each of the evaluation criteria (in-class exam grades, on-line homework & Quizzes, the final exam and recitation portion). Grades reflect your proficiency of the course content as you have demonstrated them on the evaluation criteria. Do not expect extra credit work or bonus grade assignments. Please take special note that “extra credit,” “hiring tutors,” “needing it for scholarship,” “I didn’t know what was required,” “tried really hard,” etc. are NOT any part of the grade assignment process.

Homework:
Most of your homework assignments will be administered through MyLabsPlus (MLP); MLP is the required online course delivery platform. All regular online homework assignments for the entire term are already set.

1) Lecture Homework:
You will typically have MLP online Homework assignments due on non class days each week by 11:59pm. I suggest you complete your assignments the day before each due date when possible. You have five (5) attempts per problem-type for each online problem in MLP. Using the “Help Me Solve It” feature uses one attempt. Use the attempts carefully so that you can earn a 100% on each assignment.

2) Recitation Homework:
You will have 6 MLP recitation skills review homework assignments total. You need work in your recitation and must earn at least 90% on each recitation skills review homework to get your second chance at the recitation skills quiz.

**NO LATE HOMEWORK** will be accepted for any reason whatsoever. A grade of zero will be assigned to any homework assignment not completed online and submitted by the due date and time. Specifically, due dates will NOT be extended for any reason. NO EXCEPTIONS. If you are prone to circumstances that affect your ability to meet your obligations, work ahead. Technical difficulty, including loss of internet access, is not an excuse for not completing assigned work.

During dead week you will have the opportunity to complete three (3) replacement homework assignments. If you do not complete a homework assignment by the due date during the semester or do not perform as well as you would’ve liked, you will have the opportunity to replace up to three of those grades by successfully completing the optional replacement homework assignments. Homework assignments are worth 13% of the course grade.

Quizzes (Online):

1) Lecture Quizzes:
You will have 10 MLP online Quizzes (one for one chapter) due before corresponding exam day by 11:59pm as specified on calendar. I suggest you complete your assignments the day before each due date when possible. You have five (3) attempts and there is no help feature to use. Use the attempts carefully so that you can earn a 100% on each assignment.
All MLP quizzes for the term are immediately available; due dates and times for all quizzes are posted in MLP.

2) Recitation Quizzes:
You have six (6) recitation/lab quizzes. The quizzes are due 11:59PM on Sundays. You should use your recitation time for the skills review until you are done with the skills review components.

Skills Review Process:
1) You must attempt and submit your Recitation Skills Review Quiz sufficiently prior to the posted due date (that Sunday);
2) You must earn at least 90% on the corresponding Recitation Skills Review HW assignment (in your recitation) to be permitted two more attempts on the Recitation Skills Review quiz due that Sunday. The Recitation Skills Review Homework assignments count as regular online homework assignment and you’d better do these homework assignments in your recitation and earn at least 90%.
3) Your highest Recitation Skills Quiz grade will be counted. If you do not earn the prerequisite 90% on the corresponding Recitation Skills Review HW homework; your first attempt quiz grade will be used.
The average of the recitation Quizzes comprises 9% (1.5% *6) of the course grade.

Recitation/Lab:
Math 1680 has a required recitation component that meets every week in either GAB 511 or GAB 550. The portion of class will address algebra skills review and as time permits, also serve as recitation, and course projects.
Attendance is a required and graded component of the lab. You have six (6) Recitation Quizzes administered through MLP, which comprise 9% of your course grade & six (6) Recitation worksheets administered in recitation, which comprise 9% of your course grade. Read and understand this syllabus and the syllabus for your recitation section to ensure you understand course expectations. Two or more absences from just the recitation portion constitute nonattendance and you may be administratively dropped from the ENTIRE course with a WF.

Beginning Monday, Nov.9, a student that qualifies may request a grade of “I”, incomplete. An “I” is a non-punitive grade given only if ALL three of the following criteria are satisfied. They are:
1) The student is passing the course;
2) The student has a justifiable (and verifiable) reason why the work cannot be completed as scheduled;
3) The student arranges with the instructor to complete the work within one academic year.

Learning Objectives:
Upon successful completion of Elementary Probability and Statistics, the student will be able to:

- Explain the use of data collection and statistics as tools to reach appropriate conclusions.
- Recognize, examine and interpret the basic principles of describing and presenting data.
- Compute and interpret probabilities using the rules of probabilities and combinations.
- Explain the role of probability in statistics.
- Examine, analyze and compare various sampling distributions for both discrete and continuous random variables.
- Describe and compute confidence intervals.
- Analyze association of data and calculate the correlation
- Solve linear regression and use the independent variable to predict the dependent.
- Perform one-proportion z test by using statistical methods.

Make-up Exam Policy:
NO MAKE-UP EXAMS WILL BE GIVEN. An exam may be taken prior to the scheduled date. You must request for this accommodation via email at least one week prior to day you wish to take the early exam. In the event of a schedule conflict with a university function, dental/physician’s appointment, wedding, formal, or whatever, the student must take the test early. If a student does not take a scheduled exam, a zero will be recorded for that exam and an academic alert notice will be filed.

There are three in-class exams. If your final exam score is higher than one of your in-class exam scores, then that in-class exam grade will be replaced with final exam grade. If you miss an in-class exam, a zero will be recorded for that exam grade and your final exam score will replace that one zero. If you receive a zero for cheating on an exam, the final exam score will NOT replace that zero. Again, NO MAKE-UP EXAMS WILL BE GIVEN FOR ANY REASON.
Progress Reports:
Students needing progress reports completed/signed for athletics, scholarships and/or any other organization must attend office hours to get them completed.

Recommended Keys to Success/Expectations:
Success in math classes requires a great deal of time and honest effort outside of class along with punctual attendance. You are expected to come to each class on time and stay the entire class. You are responsible for everything that happens in class. You should come to each lecture and come prepared. Spend an hour (or two) after each lecture reviewing the lesson and working on homework problems. Use the UNT Math Tutor Lab; form a learning group with a few classmates for accountability and meet with them regularly.

Math is not a spectator sport. You will not learn mathematics from watching the instructor or friends display ideas and solve problems. You must try the problems, finish problems, ask questions, correct your mistakes, put concepts in your own words, and practice, practice, practice!! An increase in effort usually results in increase in success.

Student Behavior:
Student behavior that interferes with an instructor’s ability to conduct a class or other students’ opportunity to learn is unacceptable and disruptive and will not be tolerated in any instructional forum at UNT. Students engaging in unacceptable behavior* will be directed to leave the classroom and the instructor may refer the student to the Center for Student Rights and Responsibilities to consider whether the student's conduct violated the Code of Student Conduct. The university's expectations for student conduct apply to all instructional forums, including university and electronic classroom, labs, discussion groups, field trips, etc. The Code of Student Conduct can be found at www.unt.edu/csrr.
*Texting or using any electronic messaging devices during class is not acceptable behavior and is grounds for disciplinary action.

Statement regarding use of email and attendance:
- Email may not be used in lieu of attendance. It is primarily for emergencies. YOU MUST ATTEND class to obtain course-related information. Content related questions will be addressed during office hours and scheduled appointments.
- I will only reply to email sent from UNT email accounts. You must include your full name, course name, number and section number in the subject header of your email.
- YOU are responsible for attending the required class meetings as stated in the course schedule guide.

Web Access:
Students must use the UNT Pearson MyLabsPlus website, URL: http://unt.mylabsplus.com. Access information is on the first page of this syllabus.

Math1680 list of Chapters to be taught from the online course e-book by Sullivan: Chapters 1 – 10.

If you have technical difficulties with Mylabsplus, call 1-800-677-6337

MyLabsPlus Homework Tips
- Find a relatively quiet, distraction-free place with internet connection. Commit to NOT surfing the internet while working on math (or any assignment for that matter).
- Keep a notebook for online assignments, both homework and quizzes. Write problems just as you would if the homework is submitted on paper.
- You are given five attempts per problem-type. Use the attempts carefully so that you can earn 100% for each MSL homework assignment.
- MyLabsPlus has very useful features, including viewing videos, ActivStat animations and a feature called the, “Help Me Solve It.” When you use the Help Me Solve It feature be sure to write out each of the guided steps and explanations.
- Using the “Help Me Solve It” feature uses one of your five attempts.
- You can circumvent using up an attempt when using the “Help Me Solve It” feature by going to the “Study Plan” file.
- Get help from tutors in the UNT Math Tutor Lab (GAB 440); SI’s and from the “Help Me Solve It” feature in MLP; but continue to rework a similar exercise until you can do the exercises without any assistance. Only then will be ready to do well on an exam on that material.
- Prepare for tests by reviewing notes, writing your personal learning notes, reworking homework problems, and
revisiting Chapter Quiz questions. MyLabsPlus has a Study Plan option to help you focus your learning needs. Use it also to augment your learning process.

- Start preparing and reviewing for the final exam the first week of classes. Revisit previous homework assignments, review completed in-class exams.

**MyLabsPlus Quizzes Tips**

- Find a relatively quiet, distraction-free place with internet connection. Commit to NOT surfing the internet while working on math (or any assignment for that matter).
- Keep a notebook for online assignments, both homework and Quizzes. Write problems just as you would if the homework is submitted on paper.
- You are given three (3) complete attempts per quiz. No help sources available during a quiz, the highest score counts. Allow yourself time to take advantage of all attempts. Use the attempts carefully so that you can earn 100% for each MLP quiz.
- Read the online textbook chapter that corresponds to the quiz first, prior to attempting the quiz.
- Write each quiz question and your answer. If you don't know the correct answer, write all answer choices given.
- Submit and review your Quiz results. If you missed any questions; read your online textbook again for the correct answer and write the correct answer(s) in your notebook.
- Retake the quiz.
- Start preparing and reviewing for the final exam the first week of classes. Revisit previous homework assignments, review completed in-class exams.

**ALGEBRA REVIEW PORTION (6 RECITATION QUIZZES & 6 RECITATION HWS & 6 RECITATION WORKSHEETS) Tips**

You should use recitation for algebra review until you are done with the algebra review components.

- Keep a notebook for online assignments, both recitation HWs and recitation quizzes. Write problems just as you would if the homework is submitted on paper.
- Attempt your recitation HWs before your recitation. If you don’t know the correct answer, write all answer choices given and bring them to your recitation instructor to get help.
- You must attempt and submit your recitation HWs IN YOUR recitation prior to the posted due date THAT WEEK and make sure you earn at least 90%.
- Once you earn at least 90% on the recitation HW #, you can start working on the corresponding recitation quiz #. You are given three (3) complete attempts per lab quiz. No help sources available during a recitation quiz. The highest score counts. Allow yourself time to take advantage of all attempts. Please use the attempts carefully!
- Write each recitation quiz question and your answer. If you don’t know the correct answer, write all answer choices given.
- Submit and review your recitation quiz results. If you missed any questions, you can bring your question to recitation instructor, math tutor, SI or your instructor to get help.
- Retake the recitation quiz.

**Keep a positive attitude about your ability to succeed and work diligently towards that goal.**

CHAPTER 1  Data collection
  1.1  Introduction to the Practice of Statistics
  1.2  Observational Studies versus Designed Experiments
  1.3  Simple Random Sampling
  1.4  Other Effective Sampling Methods
  1.5  Bias in Sampling
  1.6  The Design of Experiments

CHAPTER 2  Organizing and Summarizing Data
  2.1  Organizing Qualitative Data
  2.2  Organizing Quantitative Data: The Popular Displays
  2.3  Additional Displays of Quantitative Data
  2.4  Graphical Misrepresentations of Data

CHAPTER 3  Numerically Summarizing Data
  3.1  Measures of Central Tendency
  3.2  Measures of Dispersion
  3.3  Measures of Central Tendency and Dispersion from Grouped Data
  3.4  Measures of Position and Outliers
  3.5  The Five-Number Summary and Boxplots

CHAPTER 4  Describing the Relation between Two Variables
  4.1  Scatter Diagrams and Correlation
  4.2  Least-Squares Regression
  4.3  Diagnostics on the Least-Squares Regression line
  4.4  Contingency Tables and Association

CHAPTER 5  Probability
  5.1  Probability Rules
  5.2  The Addition Rule and Complements
  5.3  Independence and the Multiplication Rule
  5.4  Conditional Probability and the General Multiplication Rule
  5.5  Counting Techniques
  5.6  Putting it Together: Which Method Do I Use?

CHAPTER 6  Discrete Probability Distributions
  6.1  Discrete Random Variables
  6.2  The Binomial Probability Distribution
  6.3  The Poisson Probability Distribution (on CD)
  6.4  The Hypergeometric Probability Distribution (on CD)

CHAPTER 7  The Normal Probability Distribution
  7.1  Properties of the Normal Distribution
  7.2  Applications of the Normal Distribution
7.3 Assessing Normality
7.4 The Normal Approximation to the Binomial Probability Distribution

CHAPTER 8 Sampling Distributions
  8.1 Distribution of the Sample Mean
  8.2 Distribution of the Sample Proportion

CHAPTER 9 Estimating the Value of a Parameter
  9.1 Estimating a Population Proportion
  9.2 Estimating a Population Mean
  9.3 Estimating a Population Standard Deviation
  9.4 Putting It Together: Which Procedure Do I Use?

CHAPTER 10 Hypothesis Tests Regarding a Parameter
  10.1 The Language of Hypothesis Testing
  10.2 Hypothesis Tests for a Population Proportion
  10.3 Hypothesis Tests for a Population Mean
