Instructor: Miguel F. Acevedo  
Office: NTDP B-260  
Email: acevedo@unt.edu  
Class Hours: Th. 2:00 PM - 4:50 PM  
Office Hours: Th 10-12 AM

Teaching Fellow: Abdullah Naseer Saudagar  
Office: NTDP B-245  
Email: abdullahsaudagar@my.unt.edu  
Office Hours: TBD

Prerequisites

Circuit Analysis (EENG 2610) and Project II: Introduction to Electrical Engineering (EENG 1920)

Required Textbooks

Course Learning Outcomes

After completing this course, students will be able to:

- Practice safety in the laboratory.
- Competently use state of the art electronic test equipment (such as digital scope, waveform generator) and hardware/software tool (PSpice) to characterize the behavior of electric and electronic devices and circuits.
- Design, construct and characterize electric and electronic circuits according to specification on breadboards.
- Identify values of resistor, capacitor and inductor and pins of IC chips from datasheet.
- Use of SPICE as a tool for simulating various circuits for analysis.
- Model of components in PSpice.
- Analyze and interpret experimental results and writing lab report.
- Work in teams and carryout project planning and scheduling.
- Conduct system testing and troubleshooting in analog environments.
- Research design ideas and collect reference material that relates to their projects.
Defend their projects orally with good presentation skills.
Communicate effectively results of experiments and group projects through weekly written reports and project notebook.
Understand engineering design, the steps involved and carry out engineering design principles in relation to their project.
Demonstrate an understanding of ethical and professional issues as related to their projects.

General Policies

- Class attendance is mandatory. Attendance will be monitored.
- It is strongly encouraged to get to know each other in the class. Discussions on course materials are allowed.
- Assignments are due before the class in the following week.
- All lab assignments and assignment reports are individual work.
- Late submissions will be penalized except in extenuating circumstances.
- Please visit www.unt.edu/csrr/ for your rights and responsibilities.

Grading Policy

- Hands-On-Exercises (Pspice + Lab. Exercises), 30%
- Mini-projects, 40%
- Main Projects, 30%

Tentative Schedule by week

Subject to change by the instructor according to student progress

1. Introduction to the course; equipment and Pspice
2. Basic Instrumentation
3. DC Circuit Analysis
4. Introduction to mini-project 1
5. Transient Analysis, work on mini-project 1
6. Mini-project 1 presentation and report
7. AC Circuit Analysis, introduction to mini-project 2
8. OP-amp Circuit Analysis, work on mini-project 2
9. Mini-project 2 presentation and report
10. Transformers, introduction, proposals main- project
11. Presentations of proposals main- project
12. Main Project,
13. Main Project
14. Presentation and final report of Main Project- Part I
15. Presentation and final report of Main Project- Part II
Policies

Grades: All grades for the course will be final. No extra credit assignments or work will be considered after the final grade has been recorded.

Accommodations: The EE Department in cooperation with the Office of Disability Accommodation complies with the Americans with Disabilities Act in making reasonable accommodations for qualified students with disabilities. Please present your written accommodation request before the 12th class day.

Academic Dishonesty: Students caught cheating, plagiarizing, or any other academic dishonesty will be subject to penalty according to the new Policy on Students Standards on Academic Integrity. See full policy at http://www.unt.edu/policy/UNT_Policy/volume3/18_1_16.pdf

According to this policy the categories of academic dishonesty are:

A. Cheating. The use of unauthorized assistance in an academic exercise, including but not limited to:
   a. use of any unauthorized assistance to take exams, tests, quizzes or other assessments;
   b. dependence upon the aid of sources beyond those authorized by the instructor in writing papers, preparing reports, solving problems or carrying out other assignments;
   c. acquisition, without permission, of tests, notes or other academic materials belonging to a faculty or staff member of the University;
   d. dual submission of a paper or project, or re-submission of a paper or project to a different class without express permission from the instructor;
   e. any other act designed to give a student an unfair advantage on an academic assignment.

B. Plagiarism. Use of another’s thoughts or words without proper attribution in any academic exercise, regardless of the student’s intent, including but not limited to:
   a. the knowing or negligent use by paraphrase or direct quotation of the published or unpublished work of another person without full and clear acknowledgement or citation.
   b. the knowing or negligent unacknowledged use of materials prepared by another person or by an agency engaged in selling term papers or other academic materials.

C. Forgery. Altering a score, grade or official academic university record or forging the signature of an instructor or other student.

D. Fabrication. Falsifying or inventing any information, data or research as part of an academic exercise.

E. Facilitating Academic Dishonesty. Helping or assisting another in the commission of academic dishonesty.

F. Sabotage. Acting to prevent others from completing their work or willfully disrupting the academic work of others.
