MEEN 3110 Thermodynamics II Syllabus Summer 2014

Instructor: Xiaohua Li
Office: NTDP F101G
Phone: 940-369-8020
Email: xiaohua.li@unt.edu
Lecture Time: Monday & Wednesday 10:30 a.m.-12:20 p.m. room NTDP B140
Office Hours: Tuesday: 2:00 p.m.-3:30 p.m and open office policy

(New version 8th edition is available now)
M. J. Moran, H. N. Shapiro, D. D. Boettner and M.B. Bailey
ISBN-10: 0470495901

Çengel and Boles
ISBN 10: 0-07-131111-4

Course Description:
Exergy analysis, Gas power cycles, Gas mixtures, reacting mixtures and combustion, chemical reactions, and chemical equilibrium. The basic laws and concepts of classical thermodynamics are reviewed as their use is encountered in the course. This course also requires group project.
Pre-requisites: MEEN 2210 Thermodynamics I.

Course Learning Outcomes (CLO):
Upon successful completion of this course, students will able to:
1. Demonstrate an ability to correctly apply the 1st and 2nd laws of thermodynamics
2. Demonstrate an ability to analyze exergy and exergy destruction for different thermodynamics systems
3. Demonstrate an understanding on how to improve thermal efficiency for different thermodynamics systems based on 1st and 2nd law of thermodynamics
4. Demonstrate an ability to model and analyze various gas power cycles/systems
5. Demonstrate an understanding of gas mixtures and psychrometrics, and be able to analyze A/C systems
6. Demonstrate an ability to analyze reacting mixtures and simple combustion processes

ABET Student Learning Outcomes (SO)
a Ability to apply mathematics, science and engineering principles.
b Ability to design and conduct experiments, analyze and interpret data.
c Ability to design a system, component, or process to meet desired needs.
d Ability to function on multidisciplinary teams.
e Ability to identify, formulate and solve engineering problems.
f Understanding of professional and ethical responsibility.
g Ability to communicate effectively.
h The broad education necessary to understand the impact of engineering solutions in a global and societal context.

i Recognition of the need for and an ability to engage in life-long learning.

j Knowledge of contemporary issues.

k Ability to use the techniques, skills and modern engineering tools necessary for engineering practice.

Grades: Homework (9) 20% \( \geq 90 \)  A
Pop Quizzes (high 3/4) 15% 80-89.9  B
Exam #1 (Ch 7 only) 20% 70-79.9  C
Exam #2 (Ch 9 only) 20% 60-69.9  D
Final (Exam #3) (Ch 12 and 13) 20% \(< 60\)  F
Attendance (5/6) 5%
Total 100%

**Homework Policy:**
1. Please turn in your homework on the due day before the lecture starts. **NO late homework will be collected.**
2. Definition of “late”: when class is over (12:20pm) and the instructor steps outside the classroom, homework turned in thereafter will be considered as “late” and will not be collected.
3. Having no textbook is not a valid excuse for not doing the homework. It is the student’s responsibility to acquire textbook for his/her study.
4. Homework can be turned in earlier than the due day.
5. Homework dropped in the instructor’s departmental mailbox will **NOT** be collected;
6. Homework slid into the instructor’s office will **NOT** be collected.
7. Homework dropped in the “homework dropbox” in front of the department door will **NOT** be collected.
8. If you want to turn in your homework other than the due day or if you want to turn in your homework outside the classroom, you need to turn in your homework to the instructor either **IN PERSON** or through emails.
9. You can ask your friend/classmate to turn in the homework for you.
10. You can scan (or take a good picture using your smart phone, make sure the contents are legible) and email the homework to the instructor before the class ends (12:20pm).
11. Homework must be stapled, instructor or TA will not be responsible for lost loose homework.
12. Exceptions (late homework will be collected): medical emergence (student and
important ones); transportation/traffic emergency; religious holidays/duty, jury duty
and military duty. **Evidences must be submitted.**

**Exam and Quiz Policy:**
1. Quizzes are open book and open notes. **Exams are closed book closed notes
with formula sheets.**
2. Formula sheets can be maximum 5 pages, A4 or letter size, both sides
3. Each student is responsible for preparing his/her own formula sheets.
4. Formula sheets could include anything BUT: solutions to homework or examples.
   Student who failed to follow this rule will score zero in the exam and this
   cheating matter will be reported to the department and university.
5. Formula sheets must be turned in with the exam papers unless stated otherwise.
   Student who failed to follow this rule will score zero in the exam and this
   cheating matter will be reported to the department and university.
6. **There will be NO make-up quiz.**
7. **There will be NO make-up exam.** Exceptions: medical emergence (student and
   important ones); transportation/traffic emergency; religious holidays/duty, jury
duty and military duty. **Evidences must be submitted.**
8. **Final exam date:** August 8th 2014, Friday, 8:00 am-10:00 am, B140, covers
   Chapters 12 and 13

**Disability Accommodations:** If you need academic accommodations for disability you
must have document which verifies the disability and makes you eligible for
accommodations, then you can schedule an appointment with the instructor to make
appropriate arrangements.

**Academic Dishonesty:**
There is a zero tolerance policy for academic dishonesty. Cheating of whatsoever will
result in an automatic ‘F’ in this course and the matter will be turned over to the
appropriate student disciplinary committee.

**IMPORTANT EXAM DATES**
Exam #1 (tentative; depends on when chapter 7 is finished; Covers Ch 7 only):
   June 18th, 2014, Wednesday 10:30am-12:20 pm, B140
Exam #2: (tentative; depends on when chapter 9 is finished; Covers Ch 9 only):
   July 14th, 2014, Monday 10:30am-12:20 pm, B140
Exam #3 (Final):
   Aug 8th, 2014, Friday, 8:00 am-10:00 am, B140, covers Ch 12 and 13
