Instructor:  Xiaohua Li
Office:  NTDP F101G
Phone:  940-369-8020
Email:  xiaohua.li@unt.edu
Lecture Time: Tu & Th 11:30 a.m.-12:50 p.m. room D201 (section .001)
MWF 10:30 a.m.-11:20 a.m. room B192 (section .002)
Instructor Office Hours:  Open Office Policy. MWF, 11:30 a.m.-1:30 p.m. or by appointment
Supplemental Instruction TA Hours:  will be posted in blackboard later

Pearson, 2015 R.C. Hibbeler

Course Description:
3 hours. Basic theory of engineering mechanics, using calculus, involving the motion of particles, rigid bodies, and systems of particles; Newton’s Laws; work and energy relationships; principles of impulse and momentum; application of kinetics and kinematics to the solution of engineering problems.

Prerequisite(s): MATH 1720 and ENGR/MEEN 2301.

Course Learning Outcomes (CLO):
Upon successful completion of this course, students will:
1. Express dynamic quantities as vectors in terms of Cartesian components, polar coordinates, and Normal-tangential coordinates.
2. Compute mass moments of inertia for systems of particles and rigid bodies.
3. Solve kinematic problems involving rectilinear and curvilinear motion of particles.
4. Solve kinetic problems involving a system of particles using Newton’s Second Law.
5. Apply the principles of work and energy and conservation of energy to the solution of engineering problems involving particles and systems of particles.
6. Apply the principles of impulse and momentum and conservation of momentum to the solution of engineering problems involving particles and systems of particles.
7. Solve kinematic problems involving the translation and rotation of a rigid body.
8. Solve kinematic problems involving general planar motion of a rigid body.

ABET Student Learning Outcomes (SO)
a  Ability to apply mathematics, science and engineering principles.
b  Ability to design and conduct experiments, analyze and interpret data.
c  Ability to design a system, component, or process to meet desired needs.
d  Ability to function on multidisciplinary teams.
e  Ability to identify, formulate and solve engineering problems.
f  Understanding of professional and ethical responsibility.
g  Ability to communicate effectively.
h  The broad education necessary to understand the impact of engineering solutions in a global and societal context.
i  Recognition of the need for and an ability to engage in life-long learning.
j  Knowledge of contemporary issues.
k  Ability to use the techniques, skills and modern engineering tools necessary for engineering practice.

**Homework Policy:**

1. “Homework Day”: the day new homework will be assigned (post in Blackboard) and old homework will be collected;
   - Section.001 (Tuesday/Thursday section): Thursday
   - Section.002 (MWF section): Friday
2. Homework should be turned in on the due day before the lecture starts. **NO late homework will be collected, NO EXCEPTIONS**
3. Definition of “late”: when class is over and instructor steps outside the classroom, homework turned in thereafter will be considered as “late” and will not be collected
4. Solutions to Homework will be posted in Blackboard after 11:20 am Friday
5. Having no textbook is not a valid excuse for not doing homework. It is the student’s responsibility to acquire textbook for his/her study
6. Homework can be turned in earlier than the due day
7. Homework dropped in the instructor’s departmental mailbox will NOT be collected
8. Homework slid through the door into the instructor’s office will NOT be collected
9. Homework dropped in the “homework dropbox” in front of the department door will NOT be collected
10. Homework turned in other than the due day or outside classroom must be turned in to instructor either IN PERSON or through EMAIL.
11. If homework is turned in through email, it should be scanned (or pictured by a smart phone) and emailed to instructor before the class ends (12:50p.m. for section #1 and 11:20am for section #2)
12. Homework should be stapled, instructor or TA will not be responsible for lost loose homework
13. Exceptions (late homework will be collected): medical emergence (student and important ones), transportation/traffic emergency; religious holidays/duty, jury duty and military duty. **Documentary evidences** must be submitted.
Exams and Quizzes:
(1) Quizzes are open book and open notes
(2) Exams are closed book and closed notes with formula sheets only.
(3) Using Smart phone and/or Internet during the exam is prohibited.
(4) Formula sheets could be maximum 5 pages on top of instructor’s handouts (if any), A4 or letter size, both sides
(5) Student is responsible for preparing his/her own formula sheet
(6) Formula sheets could include anything BUT: solutions of any kind/format (symbolic or numerical) to homework or examples. Students who failed to follow this rule will score zero in the exam and the cheating matter will be reported to MEE department and the University.
(7) Formula sheets must be turned in with the exam papers (in the case of formula sheets are not checked by the instructor during the exam). Student who failed to follow this rule will score zero in the exam and this cheating matter will be reported to MEE department and university
(8) There will be NO make-up quiz. Exceptions: medical emergence (student and important ones), transportation/traffic emergency; religious holidays/duty, jury duty and military duty. Documentary evidences must be submitted.
(9) There will be NO make-up exam. Exceptions: medical emergence (student and important ones), transportation/traffic emergency; religious holidays/duty, jury duty and military duty. Documentary evidences must be submitted.

Disability Accommodations: If you need academic accommodations for disability you must have document which verifies the disability and makes you eligible for accommodations, then you can schedule an appointment with the instructor to make appropriate arrangements.

Academic Dishonesty:
There is a zero tolerance policy. Cheating of whatsoever will result in an automatic ‘F’ in this course and the matter will be turned over to the appropriate student disciplinary committee.

IMPORTANT EXAM DATES
Exam #1 (tentative; depends on when chapter 13 is finished; Covers Ch 12 & 13):
   For Section #1: Feb. 23rd, Tuesday
   For Section #2: Feb. 22nd, Monday

Exam #2 (tentative; depends on when chapter 15 is finished; Covers Ch 14 & 15):
   For Section #1: Apr. 5th, Tuesday
   For Section #2: Apr. 4th, Monday

Exam #3 (UNT official final exam schedule, dates are fixed. Covers Ch 16):
   For Section #1: May. 10th, Tuesday, 10:30 a.m.-12:30 p.m.
   For Section #2: May. 7th, Saturday, 8:00 a.m.-10:00 a.m.
